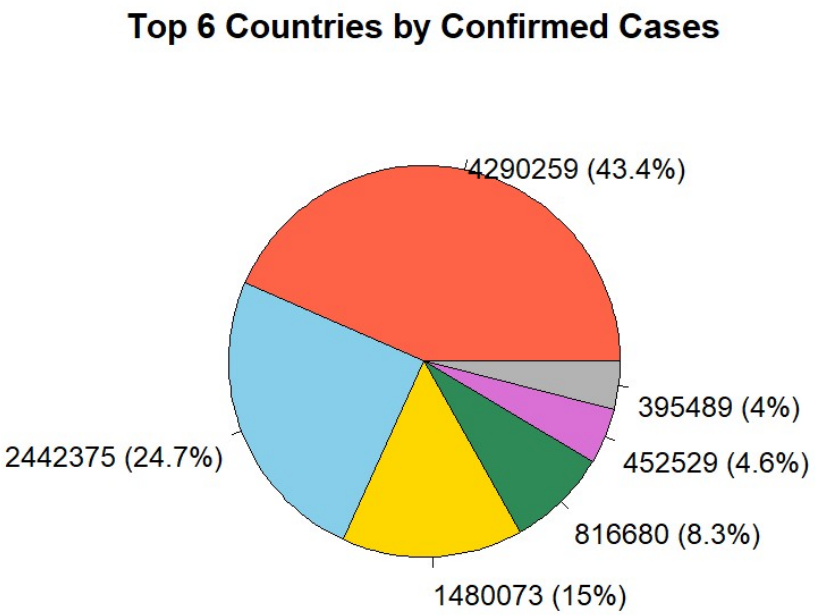
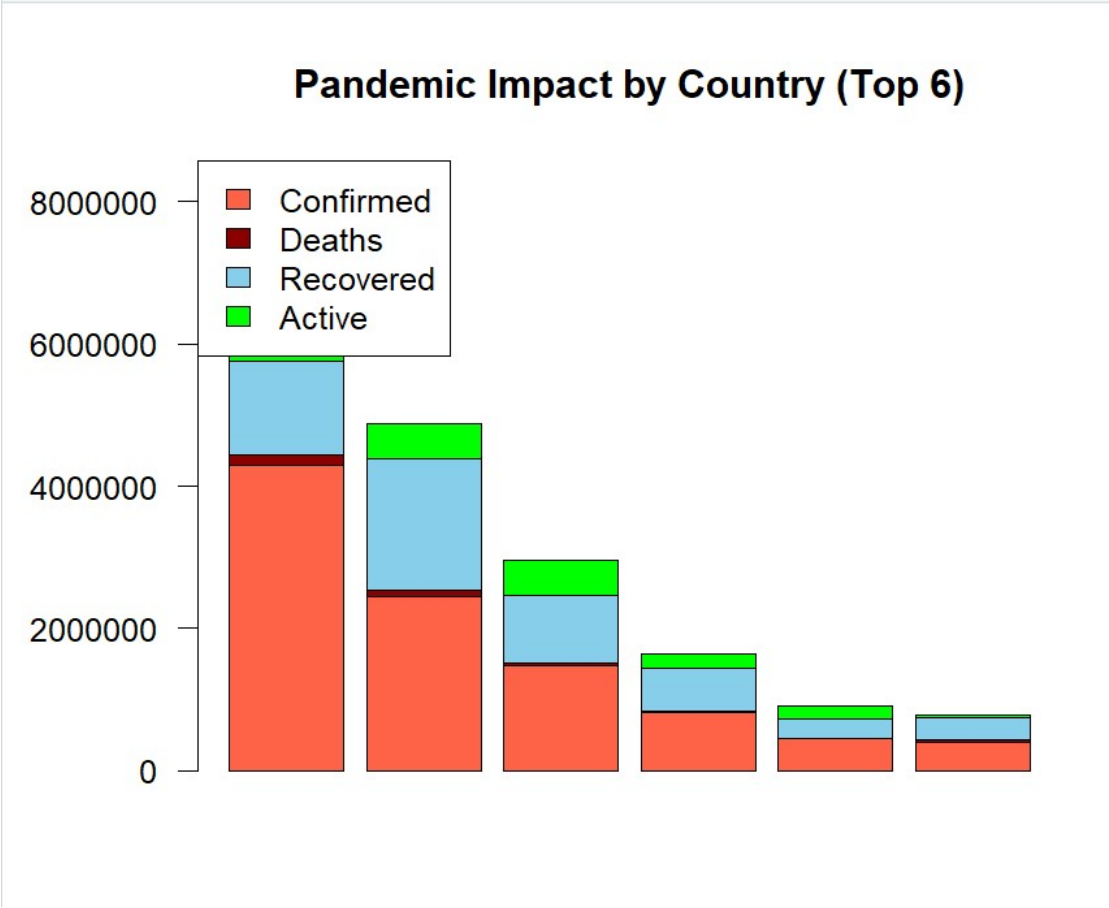
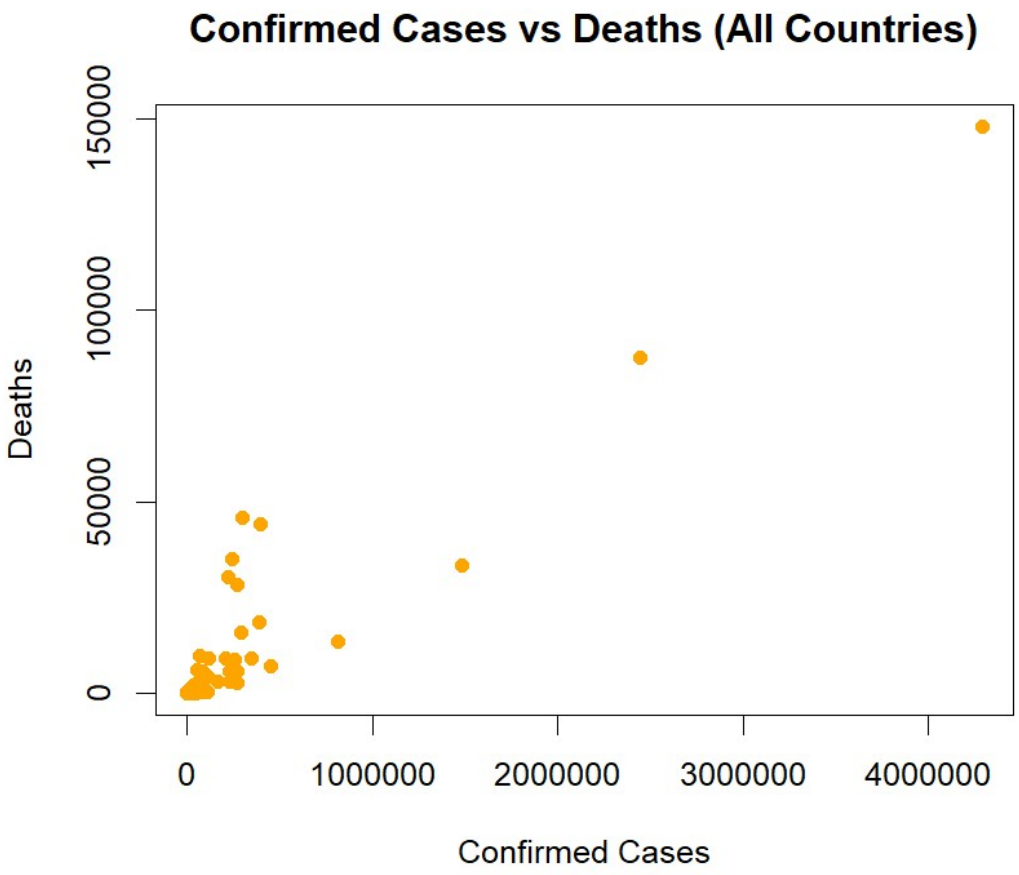
1. Pie Chart (Top 6 countries by Confirmed cases)



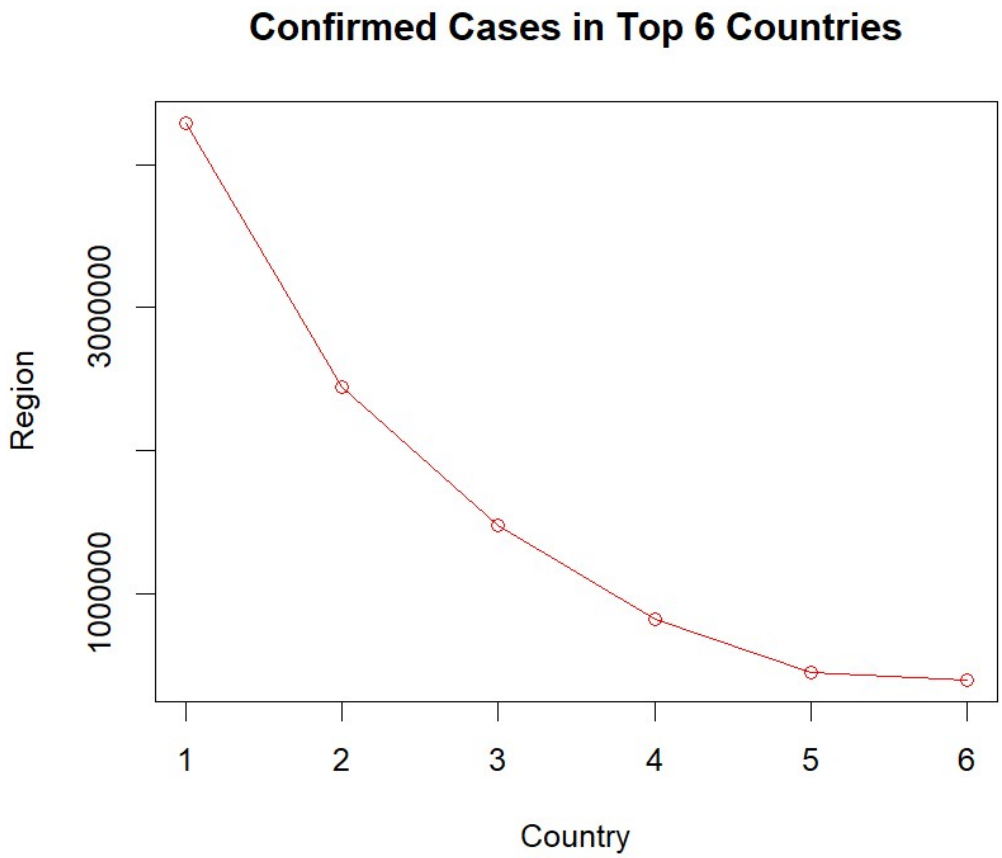
2.Stacked Bar Chart (Confirmed, Deaths, Recovered, Active in top 6 countries)



2. Scatter Plot (Confirmed vs Deaths, all countries)



3. Line Chart (Confirmed cases, top 6)



Findings:

Insights from COVID-19 Data

- The pie chart reveals that the top 6 countries account for the majority of global confirmed cases, with one country (likely the USA or India) having the largest share.

- The stacked bar chart shows a clear disparity between confirmed cases, deaths, recoveries, and

active cases among the top 6 affected countries—some countries demonstrate much higher recovery rates relative to others.

- A scatter plot between confirmed cases and deaths indicates a strong positive relationship; countries with more cases often have more deaths, though outliers can be observed.

- The Line chart highlights trends in confirmed cases among the top 6 countries, showing which regions are most affected currently.
